

Spectre Hand-Held

Device suggestions

iPad

- iPad 5 mini + cellular
- Should be able to run at least iOS 11 and newer
- Should have cellular capabilities so client can put a sim card in the device for internet connectivity in the field
- Should have minimum 32GB storage. The app takes very little space, but the iPads operating system can take up a lot of storage. More storage means when their iPads need updating, there will be enough internal storage.
- Client should purchase a hardy case and screen protector
- Many supervisors like to use a strap with the iPad case for ease of use in the field

iPhone

- iPhone 7 or higher
- iOS 11
- We don't have any memory recommendation If the device has enough space to install the app. Otherwise, the user will need to make some space in the device (remove some videos or old apps)
- The size of the app is 100 MB approx (66.5 MB exactly) and it requires at least 500 MB free space

Android

Minimum specs:

- 6MP camera
- Android 6.0
- Reputable manufacturer

Recommended specs:

- 10MP camera.
- Android 9.0 and above.
- Samsung, Google Pixel, OnePlus, Motorola, Xiaomi, Realme, Nokia, Sony
